---

Highly skilled and accomplished iOS Developer with a proven track record in developing robust and impactful apps. Able to quickly adapt to new technologies, solve complex problems, and thrive in fast-paced environments with tight deadlines.

---

## EXPERIENCE

### iOS Developer

Coolbeans Digital | Jan 2021 – Dec 2023

- Helped local and international businesses in establishing an online presence through mobile apps.
- Built quality apps with new technology using SwiftUI, UIKit, Flutter with architectures such as MV, MVVM RxSwift and MVC.
- Led the engineering efforts to ensure the quality of apps for customers by proactively making improvement and giving suggestions to Project Manager
- Collaborated closely with the Project Manager, developers, and designers on a daily basis to ensure clear communication and alignment on project objectives and requirements.
- Was responsible for shipping all clients apps to production, making sure all the requirements, documents and app review are ready within deadlines.
- Work with the QA team on a daily basis to conduct comprehensive testing and ensure high-quality deliverables.
- Proactively identify and resolve issues with team, utilizing critical thinking and innovative problem-solving to develop effective solutions that meet project requirements.

#### Key achievement:

- Researched and implemented Continuous Integration/Continuous Deployment (CI/CD) using Bitrise and GitLab. Results in less time for Testflight deployment.

### Software Developer

NSSF | Nov 2018 – Dec 2020

- Developed and maintained internal applications for Microsoft platform using .NET Framework
- Took part in improving database query from backend by writing sql functions to reduce the time for search functions across applications.
- Supported end users to ensure smooth daily operations by hot-fixing and rapid deploying.
- Transformed VB.NET applications into a C# codebases, improving code maintainability and performance while also incorporated brand new UI to make the app more appealing.

---

## EDUCATION

- **Master of Engineering in Software System Engineering** February 2024 – December 2025 (Expected)  
UTS
- **Bachelor of Education in Teaching English** January 2016 – August 2019  
Institute of Foreign Languages, Royal University of Phnom Penh
- **Bachelor's Degree in Computer Science and Engineering** November 2014 – July 2018  
Royal University of Phnom Penh

---

## SKILL

- iOS Frameworks: UIKit, SwiftUI
- Strong problem-solving and analytical skills
- Continuous Integration/Continuous Deployment (CI/CD) Tools: Bitrise
- Others: Flutter, App Distribution and Research
- Languages: Khmer (Fluent), English (Proficient), Thai (Conversational)

---

## FEATURED PROJECTS PORTFOLIO

### Online & Internet Home

- Description: An app for Online ISP customers, its aim is to help customers with customer support and also provides a convenient way to check and upgrade their internet plans
- Role: Lead iOS Developer
- Technology: SwiftUI, Firebase, ABA Payment
- Challenges: implementing custom views with SwiftUI

### AEON MALL PLUS

- Description: An e-commerce platform for AEON MALL customers. It brings the new shopping experience of multi functions and allows user to shop your favorites product with various brands.
- Role: Lead iOS Developer
- Technology: UIKit, RxSwift, SwiftUI, Firebase, ABA Payment, Associate domain
- Challenges: UI implementation and Linking firebase social media with phone number and vice versa.

### SmartNas

- A self-care app made for Smart Axiata's telecom customers. It serves as a easy way for topping up, subscribing to mobile plan and services, entertainment subscriptions, receiving offers and rewards
- Role: Developer
- Technology: UIKit, Alamofire, OneSignal
- Challenges: Setting up OneSignal

### D2D One

- Description: An express delivery that let user book multiple shippings with ease.
- Role: Lead iOS Developer
- Technology: UIKit, Google Map Sdk, CoreLocation
- Challenges: Updating driver location while app is in background, implementing complex ui using UICollectionView
